Degrees Awarded
in the Nation
and the South,
by Sex,
1979-80

SREB

Southern Regional Education Board

HIGHLIGHTS OF DEGREES AWARDED, 1979-80

-Record numbers of degrees were awarded in the South at all but the master's level.

-The South accounts for one in four of all degrees awarded (associate, baccalaureate, master's, doctoral, and first professional) in the nation.

-Women increased their share of degrees awarded at all levels.

-Women earn less than one-third of all doctorates, with most of these concentrated in traditionally female-dominated fields such as foreign languages, home economics, library science, and nursing.

-Women in the South earn a higher proportion of degrees than they do nationally at all levels except first professional.

-Women doubled their share of first professional degrees in the last five years but account for only one in four degrees nationally and one in five in the South.

DEGREES AWARDED IN THE NATION AND THE SOUTH, BY SEX, 1979-80

FOREWORD

College enrollments have moved from a general pattern of two males to each female, in the 1950s, to an even division of the sexes in the 1980s, so it is not surprising that women are now also earning an equal number of degrees.

That there is also a gradual redistribution of academic degrees among men and women according to level and field should not be news; but the speed with which this is taking place may be a matter of note. For example, only five years ago the percent of bachelor's degrees in engineering earned by women was 2.2 in the United States and 2.6 in the South; three years later the percentages were 6.7 and 6.8, respectively, and in 1980, they stand at 9.3 and 9.2 respectively. Women earned 10.3 percent of the region's MDs in 1975, 18.8 percent in 1978, and 19.6 percent in 1980, trailing the nation's percentage by about 3 percent each year.

These data illustrate what is happening in a few areas where women have been underrepresented in the past. While the bulk of degrees for women are still awarded in fields where they have traditionally been concentrated, the pattern is changing rapidly, and the problem of attracting a sufficient number of well-qualified candidates, of either sex, to fields where future shortages threaten--such as teacher education--has become a major challenge to colleges and universities.

Meanwhile, concern about manpower requirements for high technology industry, which was expresed in last year's SREB report on degrees awarded, has intensified. The production of doctorates in engineering, desperately needed for faculty in the schools of engineering, remained at an unchanged level in the nation in 1980 and, in the SREB states, actually fell four percent in the course of one year. Degrees in data processing technology have risen 21.6 percent nationally and 14.5 percent regionally since 1979, but associates in mechanical and engineering technology, who provide a necessary back-up to graduate engineers, have increased by only 1.7 percent nationally and 1.5 percent in the South.

How closely the higher educational system influences the economic development of an area is a subject that is being eyed by many states and by each region of the country at this time. The presence of a good university may not guarantee the attraction of high technology industry to an area, but states or subregions which lag in development of their educational and technical manpower resources essentially eliminate themselves from the competition at the start.

INTRODUCTION

Degrees Awarded in the Nation and the South, by Sex, 1979-80, is another in the continuing series of SREB reports derived from information on academic degrees collected by the National Center for Education Statistics.[1]

The bulk of this publication consists of two tables. Table 1 contains information for the United States, the SREB region, and each of the Southern states on the total number of degrees awarded at the baccalaureate, master's, doctoral, and first professional levels for each field in the HEGIS[2] taxonomy of academic programs. In a similar manner, Table 2 displays data on associate degrees, awarded according to the HEGIS categories for arts and science programs, and the technologies. In each of these tables, the data are further refined according to the sex of degree recipients and the control of the granting institutions.

Several supplementary tables in the narrative section offer selected displays of historical trends and a comparative analysis.

---

[1] The 1979-80 data, the latest available at the time this report was prepared, cover the period July 1, 1979 through June 30, 1980.

[2] Higher Education General Information Survey.

Data on enrollments indicate that higher education is shifting from a male orientation to one in which females account for a majority of the students. Analysis of the most recent data on degrees awarded confirms this finding. Women in 1980 earned an equal number of baccalaureate degrees, as compared to men--up 10 percent from 5 years ago. Similarly, at the master's level they accounted for half the degrees awarded nationally and almost 55 percent in the South. Despite gains at these levels and a five-fold increase in doctoral degrees awarded to women since 1975, their share of doctorates remains under 30 percent. Likewise, a doubling of first professional degrees awarded to women since 1975 still leaves their share in the 20 percent range.

It is at the baccalaureate level that women obtain their degrees in the broadest range of disciplines. Concentration in a limited number of disciplines becomes more pronounced as one progresses up degree levels. At the doctoral level, almost one half of the degrees awarded to women are in the field of education, and almost 60 percent of degrees awarded to women at the first professional level are earned in law. In the field of engineering, currently a high demand occupation, women account for an increasing share of degrees awarded, although beyond the baccalaureate level degrees in engineering drop as a proportion of all degrees awarded to women.

DEGREES BY LEVEL

Doctoral Degrees. The number of degrees awarded at the doctoral level declined slightly from 1979 at the national level, while showing very small growth for the South (Table A). Doctorates as a percent of all degrees awarded (baccalaureate and higher) have remained remarkably constant for the South, while a steady decline has taken place for the nation. Hence, the region has continued to expand its share of doctorates awarded in the nation. The current share of doctorates awarded in the South (23.4 percent) is approximately one-fourth higher than the share accounted for in 1969-70 (18.6 percent).

Table A

DOCTORAL DEGREES AWARDED,
1969-70 TO 1979-80

	United States			SREB States			
	Number	Annual Percent Change	Percent of Total Degrees	Number	South as a Percent of U. S.	Annual Percent Change	Percent of Total Degrees
1969-70	29,872	--	2.8	5,542	18.6	--	2.1
1970-71	32,113	7.5	2.8	6,057	18.9	9.3	2.2
1971-72	33,369	3.9	2.7	6,529	19.6	7.8	2.2
1972-73	34,790	4.3	2.7	6,623	19.0	1.4	2.1
1973-74	33,826	-2.8	2.6	6,810	20.1	2.8	2.0
1974-75	34,086	0.8	2.6	7,226	21.2	6.1	2.1
1975-76	34,076	0.0	2.5	7,491	22.0	3.7	2.1
1976-77	33,244	-2.4	2.5	7,475	22.5	-0.2	2.1
1977-78	32,156	-3.3	2.4	7,279	22.6	-2.6	2.0
1978-79	32,756	1.9	2.5	7,606	23.2	4.5	2.1
1979-80	32,632	-0.4	2.4	7,630	23.4	0.3	2.1

The number of doctorates awarded in the South reached a new record high which in part may reflect the later development and commitment to graduate education made by the region during the past two decades, as compared with the nation. Nationally, a peak level of doctorates was awarded in 1972-73. Despite brief reversals, the trend is one of decline. The number of doctorates awarded nationally is 6.2 percent below the peak year (1972-73), while in the South doctorates are up 15.2 percent. Compared with the number of doctorates awarded in 1969-70, the national figure is up 9.0 percent while the figure for the South is 37.7 percent higher.

Doctoral degree production in the South can be expected to continue at about the current level for the next few years. Eventually, decline similar to the pattern at the national level is likely to occur.

Master's Degrees. The pattern for master's degrees deviates enormously from that found for doctorates (Table B). Nationally, the number of master's degrees awarded increased, reversing two years of decline. However, the number of master's degrees awarded nationally in 1980 still remains 7,000 below the peak year (1976-77). The decline in the number of master's degrees awarded in the South continues as in the previous two years, although the 1980 drop was not as precipitous as that of the preceding year. The proportion of all master's degrees which is accounted for by the South dropped a percentage point and the share which master's degrees were of all baccalaureate and higher degrees awarded in the South also fell by half a percent. Only at the master's level is the number of degrees awarded in 1980 below a level previously reached in the South.

Table B

MASTER'S DEGREES AWARDED,
1969-70 TO 1979-80

	United States			SREB States			
Year	Number	Annual Percent Change	Percent of Total Degrees	Number	South as a Percent of U. S.	Annual Percent Change	Percent of Total Degrees
1969-70	209,397	--	19.5	40,470	19.3	--	15.6
1970-71	231,486	10.5	20.2	46,177	19.9	14.1	16.7
1971-72	252,774	9.2	20.7	52,739	20.9	14.2	17.9

1976-77	318,241	1.7	23.7	81,755	25.7	3.4	23.0
1977-78	312,816	-1.7	23.3	81,712	26.1	-0.1	22.8
1978-79	302,075	-3.4	23.4	78,361	25.9	-4.2	22.0
1979-80	310,887	2.9	23.0	77,338	24.9	-1.3	21.5

Baccalaureate Degrees. Both nationally and for the South, the number of baccalaureate degrees awarded represents a one percent increase over the preceding year (Table C). However, the number of baccalaureate degrees

Table C

BACHELOR'S DEGREES AWARDED,
1969-70 TO 1979-80

	United States			SREB States			
Year	Number	Annual Percent Change	Percent of Total Degrees	Number	South as a Percent of U. S.	Annual Percent Change	Percent of Total Degrees
1969-70	798,070	--	74.3	204,590	25.6	--	78.8
1970-71	846,110	6.0	73.7	214,589	25.4	4.9	77.7
1971-72	894,110	5.7	73.0	225,477	25.2	5.1	76.3
1972-73	930,272	4.0	72.7	235,593	25.3	4.5	75.2
1973-74	954,376	2.6	72.3	247,549	25.9	5.1	74.4
1974-75	931,663	-2.4	70.8	248,849	26.7	0.5	73.0
1975-76	934,443	0.3	69.5	251,548	26.9	1.1	71.2
1976-77	928,228	-0.7	69.0	250,328	27.0	-0.5	70.4
1977-78	930,201	0.2	69.3	253,036	27.2	1.1	70.6
1978-79	931,340	0.1	69.7	253,799	27.3	0.3	71.1
1979-80	940,000	1.0	69.4	256,459	27.3	1.0	71.5

awarded nationally in 1979-80 remains 1.5 percent below the peak level reported in 1973-74. The number of baccalaureate degrees awarded for the South continued to increase to a new high, 25.4 percent above the level awarded in 1969-70.

From 1969-70 to 1976-77, the proportion of all degrees awarded which was accounted for by baccalaureate degrees declined for both the nation and the South. Since that year there has been a slight increase in proportion. Except for two years at the national level and one year for the South, there has been steady growth (but at a progressively decreasing rate) in the number of baccalaureate degrees awarded each year.

First Professional Degrees. Although the increase in number of degrees awarded in 1980 is below prior years (except for 1974-75 in the South), a pattern of yearly increases in the number of professional degrees awarded continues (Table D). Since 1969-70, the number of first professional degrees

Table D

FIRST PROFESSIONAL DEGREES AWARDED,
1969-70 TO 1979-80

	United States			SREB States			
Year	Number	Annual Percent Change	Percent of Total Degrees	Number	South as a Percent of U. S.	Annual Percent Change	Percent of Total Degrees
1969-70	35,252	--	3.3	9,080	25.8	--	3.5
1970-71	38,276	8.6	3.3	9,514	24.9	4.8	3.4
1971-72	43,774	14.4	3.6	10,666	24.4	12.1	3.6
1972-73	50,435	15.2	3.9	12,718	25.2	19.2	4.1
1973-74	54,278	7.6	4.1	14,154	26.1	11.3	4.3
1974-75	56,259	3.6	4.3	14,273	25.4	0.8	4.2
1975-76	63,061	12.1	4.7	15,394	24.4	7.9	4.4
1976-77	64,780	2.7	4.8	16,001	24.7	3.9	4.5
1977-78	66,964	3.4	5.0	16,438	24.5	2.7	4.6
1978-79	69,222	3.4	5.2	17,068	24.7	3.8	4.8
1979-80	70,526	1.9	5.2	17,461	24.8	2.3	4.9

awarded in the nation has doubled and the increase is only slightly lower in the South (92.3 percent). The proportion of all professional degrees accounted for by the South is one percent lower than in 1969-70. First professional degrees continue to claim an increasing share of all degrees awarded in the South.

Associate Degrees. Nationally, a second year of decline occurred in the number of associate degrees awarded (Table E). For the South, a modest increase over the previous year was reported. Again, the bulk of the decline in associate degrees awarded in the nation is concentrated in the arts and sciences, resulting in a fall in the proportion of associate degrees represented by these fields of study.

Table E

ASSOCIATE DEGREES AWARDED, UNITED STATES AND SREB STATES, 1976-77 TO 1979-80

	United States			SREB States		
Year	Number	Percent Change	Percent of Total in Arts and Sciences	Number	Percent Change	Percent of Total in Arts and Sciences
1976-77	440,180	--	39.7	114,112	--	45.9
1977-78	449,018	2.0	37.9	119,190	4.5	43.4
1978-79	438,793	-2.3	36.5	120,011	0.7	41.7
1979-80	435,127	-0.8	35.6	120,724	0.6	41.3

An increase in the number of associate degrees awarded in the broad technology categories did occur, especially in the areas of data processing, and business and management. This is linked to heightened concern about employment prospects upon completion of study and to the persistent high demand for personnel with computer expertise, as in high technology industry.

STATE TOTALS

Production of baccalaureate, master's, and doctoral degrees since 1970-71 has experienced greater growth in the SREB states than in the United States as a whole (Table F). Regional percentage increases at the baccalaureate and master's level were almost double the increases for the U.S. At the doctoral level, the regional increase was 26 percent, compared with a 1.6 percent increase at the national level. South Carolina (48.3 percent) and Kentucky (-7.8 percent) had the largest increase and decrease, respectively, in baccalaureate degrees. The number of baccalaureate degrees, compared with 1970-71, has fallen in Arkansas, Mississippi, and West Virginia, as well as in Kentucky. South Carolina leads the SREB states in growth of master's degrees (199.3 percent increase). No decrease in master's degrees awarded was reported for any of the SREB states. Florida led the region in growth of doctorates (118.8 percent) while Louisiana recorded a decrease of 19.7 percent. Alabama and Arkansas also reported decreases in doctorates awarded.

The percentage growth in number of first professional degrees since 1970-71 was almost equal for the nation and the SREB region. In the South, the largest growth occurred in Florida (170.1); Alabama and Georgia more than doubled the number of first professional degrees awarded.

The increase in number of associate degrees awarded in the South from 1970-71 to 1979-80 was almost double that for the nation. The leading SREB state in growth of associate degrees was Alabama, followed closely by Louisiana. Other SREB states experiencing significant gains included South Carolina, Tennessee, Arkansas, Kentucky, Maryland, West Virginia, and Texas.

*Associate degrees and other formal awards involving curricula of at least two years but less than four years.

Mississippi reported the least growth in associate degrees. Florida, Texas and North Carolina rank first, second and third, respectively, in number of associate degrees awarded, and together they account for one-half of all associate degrees awarded in the South.

Texas accounts for roughly one-fifth of all the baccalaureate, master's, doctoral, and first professional degrees awarded in the South. Only at the doctoral level is it rivaled by Florida, which accounts for another fifth of the degrees. Three states (Texas, Florida, and North Carolina) account for over half of the SREB doctoral degree production. Combined, the South's three leading degree producing states (Florida, North Carolina, and Texas) account for almost 44 percent of all degree production in the South (associate, baccalaureate, master's, doctoral and first professional).

DEGREES AWARDED BY FIELD

In the following discussion, reference is made in several instances to changes over the two years between 1977-78 and 1979-80. It is felt that these comparisons are important and should be included; supporting tables are contained in the SREB report Degrees Awarded in the Nation and the South, 1977-78.

The number of degrees awarded is down in a majority of the fields at the baccalaureate, master's and doctoral levels when compared with similar data for two years previously. Degrees awarded may be expected to decline further in future years--reflecting the trend in college-age population and in enrollment.

A declining number of degrees were awarded in education at both the baccalaureate and master's levels, although this field continues to account for the single largest number of degrees awarded at the master's and doctoral levels and it ranks second to business and management at the baccalaureate level (see Tables G, H, and I). Over one-third of all master's degrees, nationally, and one half in the South are earned in education, despite pronounced declines in the total number of master's degrees awarded in education during the last several years. Significant increases, nationally and for the South, occurred in the number of doctorates awarded in education.

While the overall picture in degrees awarded for a majority of the fields of study is one of decline at all three degree levels, there are a few notable exceptions. Computer science is a field of continuing strong growth from 1975 to 1980 in number of degrees awarded at both the baccalaureate and master's

Table G

levels for the nation and the South. Business and management remains strong, especially at the master's level, due largely to the popularity and marketability of the MBA degree. At the doctoral level, computer science and business and management show a decline from the earlier 1970s. This is despite a strong employment market for doctoral preparation of individuals in computer science and selected business fields.

The number of degrees awarded in engineering is up at the baccalaureate level, while graduate-level engineering is fluctuating both in the nation and for the South.

Public affairs, a popular field in the Seventies has slowed in rate of growth since 1975. Interdisciplinary studies reflects a similar pattern, although the number of degrees awarded at the baccalaureate level is down, while at the master's and doctoral levels it is up from 1977-78.

Theology, a major growth field at the doctoral level in the early Seventies, reflects reduced growth since 1975.

The health professions field, at all three degree levels for the nation and the South, has experienced strong growth since 1971.

First Professional. The region awarded an average of about one in four of all first professional degrees. The overall rate of growth in first professional degrees awarded for the past two years is slightly higher for the South than for the nation.

The field of law accounts for half of all first professional degrees awarded in the nation and the South (Table J). In the South, the number of law degrees awarded declined from the level reported in 1977-78, while

---

[1] Includes the eight fields listed in this table, plus Pharmacy and Chiropractic.

nationally a decline was reported for the same period in the number of dentistry degrees. Osteopathic medicine and optometry show the largest 10-year increases in the South, although osteopathic medicine accounts for only 10 percent of total degree production. In the region, degree production in theology, osteopathic medicine, and veterinary medicine grew by more than 30 percent from two years ago.

DEGREES AWARDED BY SEX

Women now make up a majority of the total enrollment in higher education in the nation and the South. At the baccalaureate and master's levels this representation was reflected by an almost equal division of degrees awarded to men and women in 1979-80. The trend over the past five years, and in the most recent two years, has been for women to account for an increasing share of degrees at all levels. However, at both the doctoral and first professional degree levels the proportion of women has been far lower, despite dramatic advances in balancing the proportion of men and women awarded advanced degrees. Women have increased their share of doctorates by 50 percent and doubled their number of first professional degrees in the past five years.

In the South, women earned a slightly higher proportion of baccalaureate, master's, and doctoral degrees than in the nation. Only at the first professional level was the situation reversed. At the baccalaureate and master's levels, nationally and for the South, the share of degrees awarded to women since 1975 rose by about 10 percent. At the master's level in the South, the increased share of degrees awarded to women raised their proportion to almost 55 percent.

A fourth of undergraduate men majored in business and management--twice the number of women choosing this field--yet women almost doubled the number of degrees earned in the field in the past five years (Table K). A fifth of women nationally and a fourth in the region chose education as a major. Women chose education at three times the rate for men and continued to increase their share of degrees awarded in this field. Education, business and

management, the health professions, and social sciences were the leading fields chosen by women, accounting for over half of their majors. For men, business and management, engineering, and social sciences accounted for over half of the majors. Women had the highest representation of baccalaureate degrees (over 75 percent) in library science, home economics, health professions, and foreign languages. Men were most highly represented (over 75 percent) in the fields of engineering, physical sciences, theology, and architecture. Comparing the percentage of degrees awarded to women in the South, by field, in 1974-75 and 1979-80 reveals that women have made substantial advances in agriculture, business and management, engineering, computer and information sciences, and law (pre-law).

One in five men nationally and one in four regionally, compared to approximately one in two women, chose education as their major field of study at the master's level (Table L). Business and management and education accounted for about half of the majors chosen by men, while education alone accounted for nearly the same proportion for women. Engineering was chosen as a major by women in the South a little less frequently than nationally. Overall, women earned 54.8 percent of the master's degrees in the region, compared to 49.5 percent in the nation--reflecting the preponderance of women in teacher education programs.

Fields showing the largest increase in representation by women earning master's degrees between 1975 and 1980 were business and management, engineering, and law. Women comprised the majority (over 70 percent) of degree recipients in home economics, library science, foreign languages, health

professions, and education. Men comprised the majority (over 70 percent) of degree recipients in engineering, law, computer and information sciences, physical sciences, agriculture, business and management, and architecture.

Education remained the largest field for both men and women at the doctoral level (Table M). One out of four male doctorates, nationally, and one out of five in the South were in education while one out of three women doctorates, nationally, and one out of two in the region were in education. Approximately two-thirds of all male doctorates in the nation were in the following fields: biological sciences, education, engineering, physical sciences, and social sciences. In the South, theology would be added to that list. Women have a much higher representation in engineering nationally than they do in the South. Engineering and biological sciences have the third highest female representation among fields nationally. Women accounted for over 50 percent of doctoral degrees in only three fields: home economics (83.3 percent), library science (76.9 percent), and foreign languages (59.4 percent). In nursing, included under health professions, women received 98.3 percent of the doctorates nationally and 100 percent in the region. Nevertheless, male domination is still characteristic of most doctoral level education and contributes to the underrepresentation of women in academic careers.

Fields in which women made marked improvement in the number of degrees awarded (excluding those fields where women already have a high representation) are: (nationally) business and management, health professions, psychology, public affairs,and area studies; (regionally) communications, health professions, mathematics, public affairs, area studies,and interdisciplinary studies.

Law accounts for the largest portion of first professional degrees awarded in the United States and in the South for both men and women (Table N). Women professionals select law three out of five times, while men are likely to select it as a major in one out of two cases. The popularity of law has declined for both men and women in recent years and the decline is more pronounced for the South. Medicine was the second most popular professional field, accounting for just over 20 percent of men and women. Of all professional degrees awarded in 1979-80, women earned 21.2 percent in the South and 24.9 percent nationally.

Women do not constitute a majority of graduates in any of the professional fields. Their heaviest representation is in pharmacy, veterinary medicine, and law, accounting for over 30 percent of degree recipients nationally, and over 25 percent in the South. Women have increased their representation in all of the professional fields in recent years; however, the largest increase from 1975 to 1980 occurred in dentistry, optometry, and osteopathic medicine.

If one compares the proportion of women graduates, by field, for baccalaureate, master's,and doctoral degrees, one is struck by the fact of higher representation by women (over 70 percent), at all three degree levels, only in home economics and library science. If the threshold is reduced to 60 percent, foreign languages would be included. In virtually all other fields there is an inverse relationship between the number of degrees awarded to women and the corresponding level of the degree. The number of doctorates awarded to women ranges between one-half to one-fourth the number of baccalaureate degrees awarded. While one in two baccalaureates are awarded to

women, only three out of 10 doctorates are awarded to women. Women do appear to be slightly better off in terms of higher educational participation in the South than for the country as a whole.

The 50 percent increase in total number of doctorates awarded to women and the doubling of professional degrees awarded to them in the years since 1975 is a significant movement toward the objective of equitable opportunity in career choice in this country and in the South. In the professions, women in the South continue to lag behind the nation as a whole in number of degrees awarded.
